ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: STEAM TREATMENT OF CHIPS WITH THE ADDITION OF AN ACID LIQUID

(57) Abstract: The invention concerns a method for the pretreatment of chips that are fed to a sulphate cooking process. Through the addition of an acidic fluid to the steam treatment step, a very high ionic concentration of hydrogen ions is achieved. When the chips are subsequently formed into a slurry with a preferably sulphide-rich alkali cooking fluid, H₂S is formed locally in the chips, which gives a yield-increasing effect for the subsequent cooking step of 1-3%.
